

Why Choose Roller Shades?

Of all window treatments Roller Shades are the simplest to operate.

Their clean lines complement modern architecture and interior design perfectly.

They allow maximum shading with minimum window obstruction.

Attenuate light from translucent to blackout with your fabric choice.

The total reliability of Silent Gliss shades means you can use them for almost all situations and sizes of installations-domestic or commercial.

The Range

Systems cover from 18 inches wide to as large as 16 feet wide.

Optional cassette headboxes are available on most systems.

Unique spring and chain operated system for fast opening.

Optional side guiding on most systems.

Sloping and horizontal systems.

Double and side-by-side systems.

Operating Methods

Manual operation by decelerator spring action or chain with counterbalancing spring.

Electric operation also available.

A wide range of remote control and switching possibilities.

Our Fabrics

A comprehensive selection of flame retardant fabrics for contract use-from translucent to dim-out. Coated screen fabrics for glare protection-select the level of openness required. Colorama in translucent or opaque qualities, soft to the touch and in many different colors.

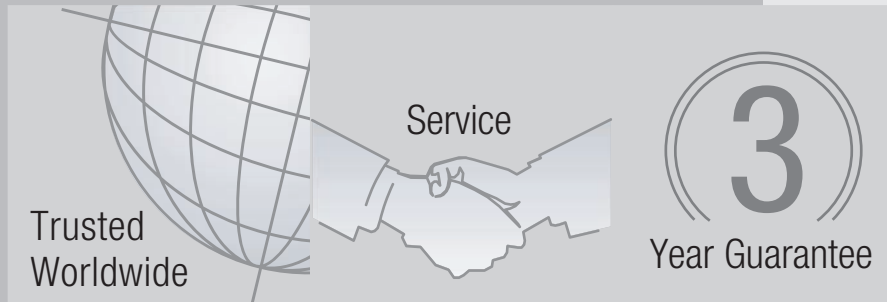

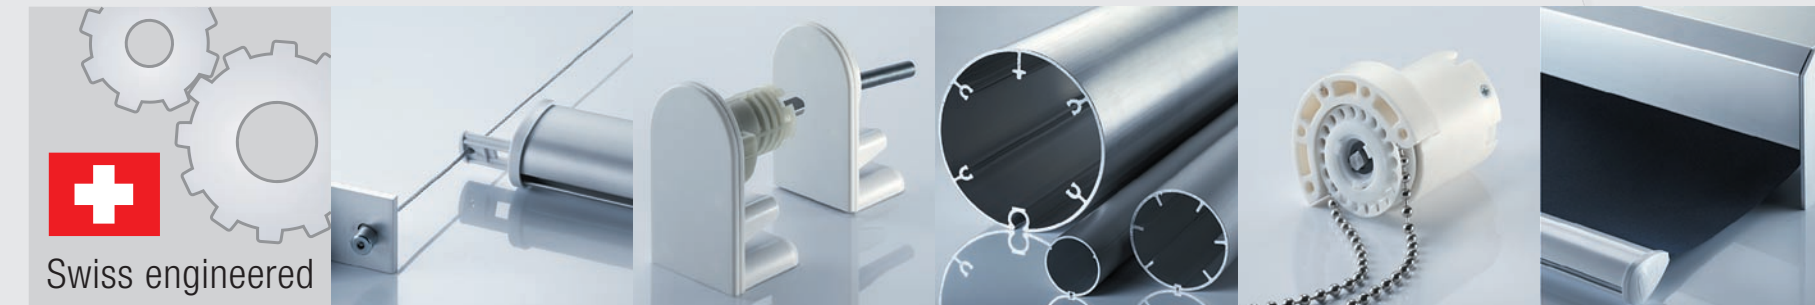

Please ask about our Project Collection and Home Collection fabric lines.

Special Features

Our spring operated shade has an optional stop controller which ensures that several shades all stop at exactly the same level.

Attractive bracket covers are offered as standard on all systems.

Precision engineered using planetary gears and counterbalancing springs, even for chain operated systems. Feather-touch operation which stops at precisely the level you choose.

Silent Gliss Advantage

Silent Gliss was the first to offer a totally reliable decelerator spring roller shade which went up as smoothly and slowly as it came down-offering new possibilities to specifiers and consumers. All systems are tested for a lifetime's performance.

Made to measure.

Wall or ceiling mounting..
