

Wave XL with Silent Gliss 5400

Wave –
A new Dimension for Draperies

A large window with white curtains is the central focus of the image. The curtains are partially open, revealing a view of trees and a clear sky. In the foreground, a dark table holds a bowl of pomegranates. The overall scene is bright and airy, with natural light streaming in from the window.

Wave XL – The perfect wave was worth waiting for.

Only a drapery from Silent Gliss can make waves while at the same time radiating tranquillity and harmony. With the new Wave XL we have given the classic a spectacular new appearance. It could be regarded as a design feature; or, with a total lack of modesty, as the most beautiful contemporary drapery in the world.

Wave XL – Applications

Wave XL reflects the current trend towards smooth rounded forms and shapes in today's interior design. It offers new alternatives for high and large application areas such as lobbies, entrance halls, reception areas, conference- and board rooms, bars and restaurants as well as for generously designed private homes and lofts.

The new Wave XL is available with the drapery track systems of Silent Gliss, either hand, cord or electrically operated.

Wave XL is more than just a new drapery heading system. Ambitious and sophisticated technique combined with precise finishing and carefully selected fabrics are required to ensure the perfect functioning of this ambitious new drapery look. It demands technical competence and experience: Silent Gliss – the right partner for those requirements.

The background of the page is a photograph of a room. It features dark red, vertically pleated curtains that cover most of the wall. On the right side, there is a tall, narrow, vertical light fixture that is illuminated from within, creating a warm, golden glow. The light fixture has a textured, possibly fabric-like, surface. The overall atmosphere is calm and sophisticated.

The original Wave

Even with smaller radii, the original Wave produces calmness and a well-proportioned atmosphere in the room. The original Wave solution with its fixed 60mm or 80mm glider cords within the track, limiting the extension of the drapery fabric, also creates a smooth and continuous wave effect.

A modern curtain heading system, combined with a suitable fabric guarantees to become a real eye-catcher in every room.

Fabrics

A perfect regular wave line is only assured when using fabrics with certain characteristics and features. All fabrics from the Silent Gliss collections were carefully selected and thoroughly tested on both systems, Wave and Wave XL. The fabrics suitable for Wave XL, Wave or both are individually labeled with the following pictograms.

Wave XL

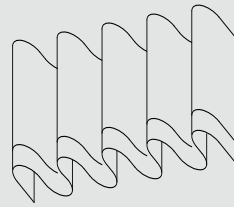

Wave XL is available one way or center drawn with the following Silent Gliss Systems:

	Hand drawn systems Silent Gliss 2191, 6010, 6100	Cubicle / Room divider Silent Gliss 6100	Cord operated systems Silent Gliss 3840, 6350	Motorized system Silent Gliss 5300, 5400 and 5420
Maximum width	19'	19'	19'	33'
Minimum width	2.5' (one way); 5' (center drawn)	2.5' (one way); 5' (center drawn)	2.5' (one way); 5' (center drawn)	2.5' (one way); 5' (center drawn)
Maximum drop	10'	10'	16'	16'
Maximum surface	21.5 square yard	21.5 square yard	35.5 square yard	59.5 square yard
Minimum bending radius	1.6'	1.6'	1.6'	1.6'
Maximum drapery weight	-	-	17 lbs	33 lbs

Due to the large wave radii a minimum distance of 9" between the track and the wall is required. The drapery stack size depends on the total system width. The depth of the curtain stack is always 14".

Wave (the original)

The original Wave system is comprised of four basic elements: The special glider-cords SG 6345 (60 mm) and SG 6346 (80 mm), the drapery heading tape SG 6349, the iron tape SG 6363 and the hook SG 3582.

Wave is available with the following Silent Gliss products:

Hand drawn drapery track systems: 2191, 6010, 6100

Cord operated drapery track system: 3840, 6350, 6200

Cubicle track system: 6100

Motorized drapery track system: 5300, 5400, 5420

The fullness and wave depth of the drapery depends on the selected glider cord and the applied spacing between the curtain hooks. The stack depth varies between 3" - 5.5".

Example of largest Wave curtain effect using 80 mm glider-cord with 160 mm curtain hook spacing.

Example of smallest Wave curtain effect using 60 mm glider-cord with 100 mm curtain hook spacing.
